

# PANDORA SERIES SAFETY DEPOSIT LOCKERS

**THE PHOENIX PANDORA SERIES** is designed to provide deposit solutions for a resurgent security deposit industry. The Pandora series can be scaled to a solution that meets your exact requirements.

Deposit lockers are a popular option for those looking to store valuable, important or expensive small items such as bullion, jewellery, documents such as birth certificates and deeds, or cash and rare coins.

- **SECURITY PROTECTION** – The doors on each locker are tested to meet the Swedish SSF1048-2 certification. The Pandora Series is designed to be accommodated within our Hyperion Demountable strongrooms, which offer a minimum of EN 1143-1 Grade VIII EX CD European test certification.
- **LOCKING** – Each locker has its own unique, mechanical key lock which is exclusive to the user of the locker and is replaced for every successor to ensure complete peace of mind for customers. The Pandora series also offers optional electronic computer-controlled locking with biometric, proximity card or PIN code entry.
- **FINISH** – The columns are finished with attractive solid aluminium forged doors, surrounded by a grey painted steel frame.
- **SPECIAL FEATURES** – Electronically controlled doors allow customers to access their lockers without the need for staff presence. The systems software allows you to manage the installation to Financial Conduct Authority (FCA) guidelines. The system also includes an alarm that will sound if somebody tries to tamper with the units.
