

**Approved for Storage  
of Controlled Drugs**

Home Office

**THE PHOENIX HYPERION SERIES** is designed to meet the exacting standards of customers demanding the best in secure protection. Suitable for use by the banking industry, bullion dealers, jewellers, safety deposit centres and the pharmaceutical industry. We can design a solution to meet customers specific requirements.

- **SECURITY PROTECTION** – Tested to EN1143-1 EFGS, with grading ranging from Grade II through Grade XI, providing Core Drill (CD) and Explosive (EX) protection.
- **CONSTRUCTION** – Composed of precast sections of steel that are typically 500mm wide. The vaults are securely constructed on site either by welding or bolting, for fast and tidy construction. The vaults and doors can be designed and manufactured to suit specific requirements, including to accommodate fork lift trucks. The external fascia is finished with concrete that can be boarded.
- **LOCKING** – Hyperion vaults can be secured with a keylock combination or digital locking, complete with time lock and delay features. The vaults can also be fitted with a grille gate, suitable for daytime use.
- **COLOUR** – The steel internals of the vaults are finished in a high quality, scratch resistant cream coloured primer paint.
- **INSTALLATION** – Phoenix Safe offer a custom design and installation service, allowing us to meet our customers exact requirements, providing expert support at every stage of the process.
